

## Balanced Range

Our most popular server series, combines pure SSD storage with high performance Intel Xeon processors, generous resource limits, with daily backups.

### At a Glance

- *High-Clock speed Hexa-Core Intel Processors*
- *Perfect for cPanel, Plesk, or NGINX webservers*
- *Super Reliable Intel DC S3700 SSD Storage*
- *Perfect Balance between RAM, CPU, SSD Storage*

RAM	CPU Cores	SSD Storage	Bandwidth
1GB	1	10GB	1TB
2GB	1	20GB	2TB
4GB	2	40GB	3TB
8GB	2	80G	4TB

Plans Starting from

**10 € / month**

## High Performance Compute Range

When you're in need of massive, distributed, highly available computing power, the High Performance Computing Server series is a proper choice for your application.

### At a Glance

- *High Performance, low contention ratio*
- *Perfect for high CPU workloads of >50% average processor time*
- *Pure Intel DC S3700 SSD Storage*
- *Very High Performance MySQL with Pure SSD*

RAM	CPU Cores	SSD Storage	Bandwidth
2GB	2	10GB	1TB
4GB	4	10GB	2TB
8GB	6	10GB	4TB
12GB	8	10GB	8TB

Plans Starting from

**15 €**/month

## Big Disk Range

Storage Servers are great for high disk footprint operations, such as archive servers, private cloud data storage such as Owncloud, backup servers, or media servers connected to other Virtual Machines within our network.

### At a Glance

- *High Sustained Read/Write Disk performance*
- *High Performance Intel Xeon Servers*
- *Perfect for private storage systems, backup systems, or file server requirements*
- *EMC Clariion Fibre Channel Fibre Channel Storage*

RAM	CPU Cores	EMC Storage	Bandwidth
1GB	1	250GB	500GB
1GB	1	500GB	500GB
2GB	1	750GB	500GB
2GB	1	1000GB	500GB

Plans Starting from

**20€/month**
